Prithivi Kai Balaji

Senior .Net Developer

C#, ASP.NET, PHP, HTML, CSS, JavaScript

Summary

Dynamic and results-driven Senior .NET developer with over 3 years of experience in designing, developing, and deploying applications and services. Proficient in C#, ASP. NET and Entity frameworks, with a strong background in cloud technology such as Azure. Actively collaborated with engineers in different geo graphical locations for delivering solutions within deadline. Passionate about mentoring and fostering a collaborative work environment.

Key Skills

- **Programming Languages / Scripting:** C#, PHP, ASP.NET, JavaScript, HTML, CSS, MySQL
- **Tools:** AZURE DevOps, Microsoft Office Suite, Git, Jira, Postman.
- **Technologies:** Microsoft Bot-Framework, MVC.
- **Networking:** OSI model, TCP/IP model, IPv4, IP subnetting.
- **Database:** MySQL, Cosmos, Postgres.
- **Testing:** Functional Testing, User acceptance testing.
- **Development methodologies:** Agile, DevOps.
- **GitHub Link:** [GitHub Repository](#)

Experience

Software Engineer, LuckBoxStudios

March 2025 - Present

Responsibilities

- Scoping, Developing and maintaining applications using .net and c#.
- Collaborated with cross-functional teams including product managers, UX designers, and QA to deliver high-quality features on time.
- Wrote clean, maintainable code and performed peer code reviews to uphold software quality standards.
- Built and maintained RESTful APIs and integrated third-party services for enhanced application functionality.
- Wrote and maintained Terraform scripts to provision and manage cloud infrastructure In Azure, enabling reproducible and automated deployments.
- Architected end-to-end software solutions, including application design, service decomposition, data flow, and infrastructure layout across cloud platforms.

Senior .NET Developer, Openbet - SportCast

April 2024 – February 2025

Responsibilities

- Scoping, Developing and maintaining applications using .net and c#.
- Collaborating with the development team and stakeholders to understand the requirements and deliver solutions that meet the needs of the project.
- Mentoring, guiding and collaborating with engineers across geographical locations.
- Participated in PI planning session to define objectives and prioritize features for upcoming sprints.
- Troubleshoot and resolve application issues, ensuring robust and reliable performances.

.Net Developer, Openbet - SportCast

Aug 2022- March 2024

Responsibilities

- Scoping, Developing and maintaining applications using .net and c#.
- Writing clean, efficient and well-documented code.

E: kbprithivi@gmail.com
M: 0431520390

- Debugging and fixing bugs and errors in the existing code.
- Collaborating with the development team and stakeholders to understand the requirements and deliver solutions that meet the needs of the project.
- Keeping documentation up-to-date and accurate, especially as changes are made to the codebase over time.
- Keeping up-to-date with emerging trends and technologies in the .NET ecosystem.
- Participating in the testing and deployment of applications.

Junior Developer, Digital Distruption Solutions

Nov 2021 – Aug 2022

Responsibilities

- Developed new enhancements for the application based on the request by client or internal stake holder.
- Performed unit test for the built features.
- Debugged code for any bugs identified and fixing the bug.
- Implemented feature using API's.
- Performed integration testing for each release.
- Updated knowledge base for each release.
- Created database view for each client depending on the requirement.
- Restoration of client's Data using sql server.

IT Engineer, Accenture Solutions

Nov 2017 – July 2019

Responsibilities

- Created test data, test scripts and executing the test scripts based on the requirement.
- Performed Testing on application based on the test scripts and raised defects.
- Documented defects and track it closure.
- Implemented automation using PS1 and windows scripting for an ad-hoc task from clients. attended selenium training scheduled by the organization.
- Supported the client specified applications based on the incidents.
- Trained new joiners on existing architecture and workflows.

Developer, Tent Software

June 2017- Nov 2017

Responsibilities

- Developed PHP based Dynamic Webpage.
- Developing compatible user interface functionality using JavaScript and jQuery libraries.
- Testing and validating work produced as a part of the development process.
- Storing and Retrieving data using MySQL Database.
- Retrieved Data Asynchronously using AJAX.
- Designing the Webpage using CSS.
- Developed Chat application between users.
- Developed code for handling session using session id.

Key Project

Easy Social Networking using PHP

A user-friendly social Networking Site developed using php in which a user can connect with people Easily. In this application the user can post data such as photos, videos and text. user's friends can like and comment on posts. one on one chat can be done between friends in this application.

- Development of web application using php, html and MySQL.
- Understanding the Requirements of the project and software lifecycle.
- Having an excellent communication and interpersonal skills with co-workers
